Women and Development Fund (WDF) Life Skills Certification	Training adults in leadership skills The YWCA of Trinidad and Tobago had scheduled a pilot leadership training programme for late 2005 for which corporate sponsorship has been sought. In order to run the programme a YWCA staff member received training in the life skills model of education - theory and techniques - and communication skills, goal setting, conflict resolution, managing change and handling stress. As well as teaching the participants of the leadership development programme, the trained staff person is now training other members/staff of the YWCA in running leadership programmes.
